1. Company profile

1.1 Introduction

Agrihive Garden (Pty) Ltd is a company registered under the Lesotho companies Act of 2011 to carry out agriculture related business such as crop farming, mixed farming and fresh water aquaculture farming. The company started operating in 2014 specializing in vegetables seedlings up until 2020 when it was officially registered under the companies act. The company is located at Abia in Maseru, Lesotho.

1.2 Mission

Our mission is to prevent food disparities through provision of vegetables seedlings, reducing post-harvest losses and training the community on soilless farming. Our business model strives to improve the lives of our shareholders and employees while also positively impacting communities in improving food security.

1.3 Vision

No one goes hungry.

1.4 Objectives of the company

- To provide a sustainable and reliable supply of seedlings for the Lesotho market.
- To participate actively in the economy of Lesotho towards food security.
- To invest in local community and development in agriculture sector.
- To empower women and youth in innovative climate resilient soilless farming.

1.5 Core values

1.5.1 Sustainability

We are committed in friendly practices that protect our environment for future generation.

1.5.2 Empowerment

We invest in growth of women and youth, enabling them to become leaders, innovators and change makers in agriculture.

1.5.3 Excellence

We strive for high standards in seedlings and vegetables production, agribusiness and training, ensuring quality and long term impact

1.5.4. Community

We believe knowledge sharing, collaboration and trainings to up lift our smallholder farmers, women and youth for collective growth.

1.5.5 Innovation

We embrace new ideas, technologies, and methods to advance agriculture and improve productivity and resilience.

1.6 Services and products offered

1.6.1 Vegetables seedlings

At Agrihive Garden, we produce a variety of vegetables seedlings with a growing medium which is very good in water retention and aeration in Styrofoam trays. The medium allows enough roots development. Our seedlings are climate adaptive towards environmental conditions brought by climate change conditions because they are well hardened off. Moreover, they easily adapt to soil after transplantation due to medium used.

1.6.2 Soilless crop production and training

We produce leaf crops using aeroponics systems and enhance literacy to the community through training women and youth so that they can be food sufficient all year round.

1.6.3 Hermetic Bags

We distribute Purdue Improved Crop Storage bags to grain farmers and households so that they can store their grains and cereals to mitigate post-harvest losses caused by weevils.
